

MCR10016

Fix Incorrect Comment in `mc.incl.alm`

Eric Swenson

December 25, 2016

1 Issue

There is a typo in the file `>ldd>incl>mc.incl.alm`. The field `scu.ir.mif` is documented as "DL - Multiword Indicator" but should be documented as "DL - Mid-instruction interrupt Indicator".

This issue is documented in the ticket:
<https://sourceforge.net/p/dps8m/tickets/100/>

2 Proposed Change

The proposed change is to update the following line:

```
bool    scu.ir.mif,000040    DL - Multiword Indicator
```

with the line:

```
bool    scu.ir.mif,000040    DL - Mid-Instruction Faults Indicator
```
