## Fix Typo in `x.repair.info`

Eric Swenson

December 27, 2016

### 1 Issue

This MCR addresses ticket:

<https://sourceforge.net/p/dps8m/tickets/42/>

There is a typo in the file `>doc>subsystem>operator>x.repair.info`, where the `salvage_dir` command is referred to as `salvag_dir`. The fragment:

---

```
salvager_arguments
    are arguments acceptable to the salvag_dir command. The default is
    the single argument, -compact.
```

---

should be corrected to be:

---

```
salvager_arguments
    are arguments acceptable to the salvage_dir command. The default is
    the single argument, -compact.
```

---

### 2 Proposed Change

The proposed change is to make the above correction.
