Correct Spelling Error in dm_per_system_.pl1

Daiyu Hurst

10 January 2017

1 Issue

An error message issued by dm_per_system_ (part of Data Management) incorrectly spells the word “directory” as “direcotry”:

```
1310 as LOGIN Data_Management.Daemon dmn dm (create)
1310 dm Initializing Data Management in ring 2.
1310 dm
1310 dm Error: dm_per_system_error by dmsd_overseer_$|2103
1310 dm (>system_library_standard>bound_dm_)
1310 dm Entry not found. By entry get_system_dir: Unable to find system direcotry
>site>Data_Management.
```

The correct spelling is “directory”.

The source file in question is dm_per_system_.pl1 contained in ldd>sss>source>bound_dm_.3.s.archive.

2 Proposed Change

The proposed change is to correct the spelling by changing “direcotry” to “directory”.
