

Subject: MCR-10046, Add "[gm.info](#)" as an add name on "[generate_mst.info](#)"

Author: Eric Swenson

Date: January 17, 2018

Introduction

generate_mst is the command to generate a Multics boot tape. It has the add name "gm". It has an info segment in >doc>privileged>generate_mst.info. However, this info segment is missing the add name "gm.info".

Problem

The segment has only one name on it: generate_mst.info.

Proposed Changes

Add the name "gm.info" to the generate_mst.info segment.

Testing of the Change

Make sure you can do a "help gm" and "lh gm" and locate the correct info segment.
