

Lawrence Livermore Laboratory. A second is to be shipped there before year-end, while a third will be installed in the Cybernet network in 1975. . . Honeywell is having considerable--and surprising--success with the ultra-secure Multics operating system, chiefly due to software improvements bringing Fortran up to the level of GCOS/6070 Fortran and beyond. Besides 3-5 systems within Honeywell, Multics has been installed or committed within Nippon Electric, Rome Air Development Center, USAR Data Services Center, and Ford. The
